

IP – 2

IP DATA BROADCAST --> HDMI/AV

IP-2 is designed for a processing data broadcast via Ethernet into HDMI or AV.

Perfect multi-program advertising system for unlimited number of HD displays can be made together with HDMI to IP streamer RFT-897 and IP-2

IP-2 supports MPEG-2 and H.264 standards.

It works over any broadband IP network.

Easy WEB control interface.

Features

- ❑ IP multicast signal to HDMI or AV
- ❑ Programming through web browser

Technical specification

IP input

- ❑ SPTS
- ❑ UDP
- ❑ Multicast

Output

- ❑ HDMI, HDCP 1.2
- ❑ Nominal video output level 1 Vpp
- ❑ Video output impedance 75 ohm
- ❑ Nominal audio output level 0,5 Vrms

General

- ❑ Power consumption 5VDC/1,0A
- ❑ Input connector RJ-45
- ❑ Video connectors HDMI male and RCA
- ❑ Audio connector 3,5mm jack
- ❑ Dimensions (mm) 93 *112,5* 27,5
