

TM – 800

VSB STEREO TV MODULATOR

New TM-800 stereo modulators are versatile instruments for security control, internal information channel and expanding CATV/SMATV system.

The high quality VSB TV-modulators give perfect adjacent channel operation on VHF/UHF band.

800-series modulators TM-818/TM-828/TM-838 features high output level with excellent signal purity.

Features

- ❑ Low stock keeping due to wideband modulator
- ❑ Twin and triple modulators in 1 RU minimize space requirement at headend
- ❑ A2 or NICAM stereo
- ❑ All features are microprocessor controlled

Technical specification

- ❑ Modulation AM VSB
- ❑ Number of modulators
TM-818 1 (1 output)
TM-828 2 (2 outputs)
TM-838 3 (3 outputs)
- ❑ Output frequency range
112,25 – 855,25 MHz
- ❑ Transmission standard B/G
- ❑ Maximum output level
105 dB μ V/output
- ❑ Nominal video input level
1,0 Vpp
- ❑ Video input impedance
75 ohm
- ❑ Nominal audio input level
0,5 Vrms
- ❑ Audio input impedance
4,7 kohm
