

RFC- 16/1

ACTIVE COMBINER

RFC-16/1 is an active RF combiner for both digital and analogue signals.

It gives giving high output level of up to 16 modulators or other signal sources.

It is designed for standard 19" rack mounting.

Features

- For analogue and digital signals
- No insertion loss
- 2 RU
- High output level

Technical specification

- 16 inputs
- 1 output
- Frequency range
45 – 860 MHz
- Input level max.
105 dBuV/input
- Output level max.
105 dB μ V
