

PA - 30

SMALL SIZE, LOW COST CATV DISTRIBUTION AMPLIFIER

PA-30 is a high performance broadband amplifier with high output level while having low current consumption.

PA-30 is an economical solution for modernising cable networks for interactive services.

PA-30 can be powered locally or via coaxial cable.

Features

- ❑ Low noise figure
- ❑ Size only
85 mm * 70 mm * 25 mm
- ❑ Remote powering system

Technical specification

- ❑ Frequency range
Model PA-30/65 88-862 MHz
Model PA-30/30 47-862 MHz
- ❑ Basic gain 28 dB
- ❑ Max. output level 115 dB μ V
- ❑ Noise figure 3 dB
- ❑ Return path
Model PA-30/65 5-65 MHz
Model PA-30/30 5-30 MHz
- ❑ Return path gain 0 dB
