

DRM – 814M2

DVB-S/S2/T/T2/C HD or SD to AM scaling remodulator VSB A2

DRM-814M2 remodulator is for processing FTA digital DVB signals into standard CCIR channels.

DRM-814M2 is designed for CATV and SMATV headends, where flawless performance must be secured at all times.

High quality VSB stereo modulator gives us excellent adjacent channel operation on VHF/UHF band.

Features

- ❑ DVB-S/S2/T/T2/C programs HD/SD
- ❑ Support MPEG-2, H264 and H.265
- ❑ A2 stereo modulator

Technical specification

Demodulators

- ❑ Frequency range:
IEC input: 48-858MHz
F input: 950-2150 MHz
- ❑ Input level -65 ... -25 dBm
- ❑ DVB-S/S2/S2X/T/T2/C compatible demodulator

Transport stream decoder

- ❑ Symbol rate 4 - 45 Ms/s
- ❑ MPEG-2, H.264 and H.265

Modulator

- ❑ Modulation AM VSB
- ❑ Output frequency range 112,25...855,25 MHz
- ❑ Maximum output level 105 dBuV per output
- ❑ Spurious products \leq 60dBc
