

NCS-1000

RJ-45 Ethernet Splitter (= 3-way 1Gbit/s switch)

Features

- ❑ GIGABIT Ethernet 1000Mbit/s
- ❑ Multicast support
 - 900Mbit/s
- ❑ Very small size

NCS-1000 is very handy device when there is need to connect 2 ethernet RJ-45 devices on LAN, but there exists only one ethernet RJ-45 LAN socket or cable.

NCS-1000 works 1Gbps network with over 900Mbit/s speed. Device can be used splitting IPTV to different end devices. All ports are equal, and can be used in both directions.

Power supply voltage +5V can be feed conveniently via including USB-C cable from an system used device or by using external USB power supply adapter.

Technical data:

Connectors:

- ❑ Dataports in/out 3* RJ-45
- ❑ Power supply USB-C

COMMON:

- ❑ Power consumption 5VDC/0.3A
- ❑ Size: 57mm*53mm* 21mm
