

Pro FM-75

FM repeater/gapfiller

Pro FM is a gapfiller designed for tunnels, mine or any sort of buildings and residences where FM field strength is not strong enough.

It consists of a selective FM pre-amplifier and high power transmitting amplifier.

Pro FM is easy to be installed and all adjustments are very simple. Easy right output level adjustment by 3 colour LEDs.

Features

- Selective FM band
- High gain
- Low noise figure

Technical specification

- Frequency range
88 ... 108 MHz
- Max. gain 65 dB
- Min. input level
65 dBuV
- Max. input level
85 dBuV
- Max. output power
130 dBuV (100 mW)
- Power consumption
230VAC/6 W
- Dimensions
75mm*130mm*355
mm
